

Dustbuster 2

Dustbuster 2 is an environmentally safe, powerful polymer emulsion that produces highly effective control of dust and erosion. It provides superior bonding, cohesion and the ability to penetrate, saturate and bond surface dust and aggregate together. The result is a hard, dust free water resistant resilient surface.

Dustbuster 2 is easy to apply using conventional methods, water bowsers, water hoses or spraybars on material conveyors. With this product dust control can be effective from just a few days to over a year depending on the rate of Application.

Dustbuster 2 provides effective dust control on stock piles of all types including:- lime, coke, coal, ore pellets, slag, aggregates, dust, sand, fly ash and many others. The product prevents erosion or coal stocks and dust blows on power station lagoon sites and fly ash bunds. It has been used in many and varied situations:- Road construction, Steel works, Power stations, Quarries, Coal mining, Public parks, footpaths, Bike trials, Bridal paths and military applications

The product is supplied in 1000 litre IBCs or bulk (tanker loads)

Eliminates PM10 particulates

Is environmentally safe

Creates a stabilized surface

Increases load bearing strength of all types of soils

Non toxic does not contaminate streams, soils or vegetation

Does not track from tyres

Blends with surroundings

Prevents wind and rain erosion
